EXECUTIVE SUMMARY

PROJECT AND PUBLIC PURPOSE

The Department of Local Government (Local Government-1 Branch), Government of Punjab sanctioned a research project on 'Social Impact Assessment of acquiring land at village Taraf Saidan (now within Municipal Limits), Tehsil Ludhiana (East), Distt. Ludhiana for construction of Intermittent Pumping Station (Disposal)' which has been carried out as per the provision of **The Right to Fair Compensation and Transparency in Land Acquisition and Resettlement and Rehabilitation Act 2013** (RFCTLARR Act, 2013). As per the RFCTLARR Act, 2013, a Social Impact Assessment (SIA) is required to be carried for initiating land acquisition notification under section 11 of the act. One of the objectives of the Social Impact Assessment is to examine whether the proposed project, is a public purpose project or not.

The proposed project site for acquisition is a piece of land of 400 sq. yards (334.57 sq mtrs) in Taraf Saidan village, Tehsil Ludhiana (East), District Ludhiana. The Department of Local Government allocated funds to the Department of Economics and Sociology, Punjab Agricultural University (PAU), Ludhiana to perform this task for the year 2022 as per the notification of Department of Local Government (Local Government-1 Branch), Chandigarh letter no. 06/02/2022-2|g/1445 dated on 06-10-2022.

The main motives behind conducting this study, as highlighted by the Department of Local Government (Local Government-1 Branch), Chandigarh were to analyze socio-economic indicators of the project area and to carry out the social impact assessment (SIA) study of the land acquisition project in consultation with Municipal Council, Ludhiana.

The land proposed for acquisition is owned by Mr. Baldev Singh Grewal and the SIA survey was conducted as per the guidelines of Government of Punjab. There is no construction in the proposed area. This land is situated at a distance of about 0.5 km from the *pucca* road, 0.5-1 km from the nearest bus-stand and about 0.5 km from the nearest market. Total land of the Taraf Saian village that is proposed to be acquired by the government is 400 sq. yards (334.57 sq. mtrs) which is lying barren for years and not being utilized in any way.

Table: Objectives of SIA

Sr. No.	Aspects of SIA	Observations	Source
1	Assess whether the proposed acquisition serve the public	Total land proposed to be acquired for construction of intermittent pumping station (disposal) is approximately 400 square yards (334.57 sq. mtrs.) situated in Taraf Saidan village (now within Municipal Limits), Tehsil Ludhiana (East), District Ludhiana. It is proposed that the scheme will help in disposal of waste water in scientific way which will be a facility to general public. Therefore, the proposed acquisition serves the public purpose. The ownership of this land will vest with Municipal Corporation, Ludhiana.	Municipal Corporation Ludhiana and Field study
2	Estimate number of affected families and number of families among them likely to be displaced	The land proposed for acquisition is owned by Mr. Baldev Singh Grewal and no family is likely to be displaced.	Supplied by Municipal Corporation Ludhiana and Field verification
3	Understand the extent of land public and private houses, settlement and other common properties likely to be affected by the proposed acquisition	The land is lying barren for years and not being utilized in any way.	Municipal Corporation Ludhiana and Field study
4	Understand the extent of land acquired is bare minimum needed for the project	With the consultations of LAC and others stakeholders, it came out that the land being acquired is of bare minimum need. The land has its boundary with Budha Naala which has become a major source of pollution in the region. Therefore, the construction of intermittent pumping station (disposal) at this site will help in disposing the waste water in a scientific manner and facilitate general public.	Secondary sources and field verification

5	Study of the social impact, nature and cost of addressing them and impact of these cost on the overall cost of the project vis-à-vis the benefit of the project	Described below	Field study and secondary sources
---	---	-----------------	-----------------------------------

Analysis of Social Impact of Acquisition of acquiring land in village Taraf Saidan, Ludhiana (East) for the construction of intermittent pumping station (disposal)

Type of Impacts	Mitigation measures
Loss of land having area of 400 square yards (334.57 sq. mtrs.), which is being owned by Mr. Baldev Singh Grewal	- Compensation as per provision of RFCTLARR Act 2013 - Rehabilitation assistance

Comparison of positive and negative impacts from the project

Positive Impacts	Negative Impacts	Remarks
- Facility to the general public by disposing the waste water in scientific manner - Reduction in the toxicity level of water in Budha Naala - Improvement in the health status of the residents of Ludhiana city as well as whole state.	- Air pollution during construction - Loss of land which is being owned by Mr. Baldev Singh Grewal	Keeping in view the whole analysis, land acquisition to construct intermittent pumping station (disposal) at village Taraf Saidan (now within Municipal Limits), Tehsil Ludhiana (East). Distt. Ludhiana would be beneficial to society at large. It is advised to allocate the fairest reward for impacted prty to reduce the impact caused by acquiring land.

The land owner Mr. Baldev Singh Grewal was contacted many times but he was not keen to give details. The proposed site for construction of intermittent pumping station (disposal) is abutting with Budha Naala and is lying barren for years. This site is not being utilized in any way.

Therefore, keeping in view the whole analysis of land acquisition, the construction of intermittent pumping station (disposal) on this site serves the public purpose and will positively impact the health and quality of life of the residents of not only Ludhiana city but all over the state. The positive impacts of acquisition outweigh the negative ones and this acquisition will be a facility to general public. It is advised to allocate the fairest reward for impacted party to reduce impact caused by acquiring land.

Chapter 1

INTRODUCTION

The Department of Local Government (Local Government-1 Branch), Government of Punjab sanctioned a research project on ‘Social Impact Assessment of acquiring land at village Taraf Saidan (now within Municipal Limits), Tehsil Ludhiana (East), Distt. Ludhiana for construction of Intermittent Pumping Station (Disposal)’ which has been carried out as per the provision of **The Right to Fair Compensation and Transparency in Land Acquisition and Resettlement and Rehabilitation Act 2013** (RFCTLARR Act, 2013). Under section 11 of this act, a Social Impact Assessment (SIA) is required to be carried out for initiating land acquisition notification. The SIA study focused on the following objectives: -

1. To assess whether the proposed acquisition serves public interest.
2. To estimate the number of affected families and number of families among them likely to be displaced.
3. To understand extent of land (public and private), house, settlement and other common properties likely to be affected by proposed acquisition.
4. To analyze alternate place (if any).

The proposed project site for acquisition is a piece of land of 400 square yards Taraf Tairan village (now within Municipal Limits), District Ludhiana. The land is abutting with Budha Naala which runs through the Malwa region of Punjab, India and after passing through the highly populated Ludhiana district of Punjab, it drains into Sutlej River. Earlier, Budha Naala used to be fresh water channel and asset to the Ludhiana city but now it has become a source of public nuisance with a very high level of toxicity in the water possessing serious health hazards. It has become an open sewer rather than the stream.

The Department of Local Government allocated funds to the Department of Economics and Sociology, Punjab Agricultural University (PAU), Ludhiana to carry out the present study for the year 2022.

1.1 Background of SIA

Social Impact Assessment (SIA) includes the processes of finalizing, monitoring and managing the intended and unintended social consequences, both positive and negative, of planned interventions and any social change processes invoked by those interventions. SIA

alerts the planners and programme executors of the likely benefits and costs of a proposed project, which may be social, cultural, and/or economic and such others. The knowledge of these likely impacts in advance can help decision-makers in deciding whether the project should proceed as it is, or proceed with some changes, or dropped altogether. The most important outcome of SIA is to develop mitigation plans to overcome the potential negative impacts on individuals and communities and the society at large.

1.2 Objectives of the Scheme

The main motives behind conducting this study, as highlighted by the Department of Local Government (Local Government-1 Branch), Government of Punjab was to analyze socio-economic indicators of the project area; and to carry out the social impact assessment (SIA) study of the land acquisition project in consultation with Municipal Council, Ludhiana.

1.3 Justification of Public Purpose

One of the objectives of the SIA is to examine the nature of proposed project; whether it is a public purpose project or not. The proposed land acquisition is of village Taraf Saidan (now within Municipal Limits), Distt. Ludhiana for construction of intermittent pumping station (disposal). This site has its boundary with Budha Naala which has become a major source of pollution in the region as well as in the Sutlej River as it gets polluted after entering the highly populated and industrialized Ludhiana city, turning it into an open drain. Everyday tonnes of raw sewage from Ludhiana flows into the Sutlej River through Budha Naala and is distributed all over the state through irrigation canals. Therefore, the main aim of constructing intermittent pumping station (disposal) is to dispose the waste water in a scientific manner and facilitate general public. Moreover, the land is to be acquired by the Municipal Council, Ludhiana, hence, the land acquisition for the construction of intermittent pumping station (disposal) serves public purpose. The SIA will bring out clarity to the government and the people for informed decision for acquisition, irrespective of public interest.

1.4 Team Composition

Drawing and disbursing officer: The Head, Department of Economics and Sociology,
PAU, Ludhiana

Controlling officer of the scheme: Director of Research, PAU, Ludhiana

Funding Agency: Department of Local Government (Local Government-1 branch), Chandigarh

Principal Investigator of the scheme: Dr Kamal Vatta, Professor & Head

Co-principal Investigator: Dr Sanjay Kumar, Senior Agricultural Economist
Dr Sanjeev Kumar, Agricultural Economist;
Punjab Agricultural University, Ludhiana

Chapter 2

ESTIMATION AND ENUMERATION OF AFFECTED FAMILIES

2.1 Study Area

The present study was undertaken to assess the social impact of land acquisition in village Taraf Saidan (now within Municipal Limits), Tehsil Ludhiana (East), Distt. Ludhiana. The SIA study was conducted as per the guidelines of Government of Punjab.

2.2 Detail of Land

The land proposed for acquisition is owned by Mr. Baldev Singh Grewal. The details of the land to be acquired is given in Table 2.1, while the map of area to be acquired has been given in Fig. 2.1.

Table 2.1 Details of land to be acquired

District	Tehsil	Village & Hadbast No.	Khasra No.	Area to be acquired
Ludhiana	Ludhiana (East)	172	1273, 1375	400 square yards (334.57 square meters)

Chapter 3

LAND ASSESSMENT

3.1 Background

Social impact assessment (SIA) of the proposed village Taraf Saidan (now within Municipal Limits), Tehsil Ludhiana (East), Distt. Ludhiana has been carried out as per provision of the Right to Fair Compensation and Transparency in Land Acquisition and Rehabilitation and Resettlement Act, 2013. The following sections discuss the extent of land acquisition, status of affected land, distribution of land to be acquired according to location, distribution of respondents according to usage of land and kind of structures at acquired land.

3.2 Extent of Land Acquisition

The land proposed for acquisition is a piece of land of 400 square yards (334.17 sq. mtrs). The SIA survey was conducted, as per the guidelines of Government of Punjab.

3.3 Status of Affected land

Table 3.1 clearly shows that land to be acquired falls in the urban area.

Table 3.1 Type of place where land is to be acquired

Type of Place	Number of Respondents	Percentage (%)
Rural	0	0.00
Urban	1	100.00
Total	1	100.00

Table 3.2 presents the distribution of land to be acquired according to the location. This land is situated at a distance of about 0.5 km from the *pucca* road, 0.5-1 km from the nearest bus-stand and 0.5 km from the nearest market. The land is abutting with Budha Naala, earlier known as Budhha Dariya.

Table 3.2 Distribution of land to be acquired according to location

Location of Land	Distance (Km)
Nearest <i>Pucca</i> Road	0.5
Bus Stand	0.5-1
Nearest Market	0.5

Total land of the Taraf Saidan village that is proposed to be acquired by the

government is 400 square yards and is currently not being used for cultivation or any other purpose (Table 3.3).

Land Usable	No. of Respondents	Percentage
Land is continuously under use	0	0.00
Land is not under use	1	100.00
Total	1	100.00

Table 3.3 Distribution of respondents according to usage of land

During the survey, efforts were made to collect information about structure on the proposed land. There is no construction in the proposed area and the site is lying barren for years (Table 3.4).

Table 3.4 Kind of structure/trees at acquired land

Particular	No.
Pump house	Nil
Electricity transformer	Nil
Any other construction	Nil

Chapter 4

SOCIO-ECONOMIC IMPACT OF LAND ACQUISITION AND SOCIAL IMPACT MANAGEMENT PLAN

The present study was undertaken to assess the social impact of land acquisition for construction of intermittent pumping station (disposal) at village Taraf Saidan (now within Municipal Limits), Tehsil Ludhiana (East), Distt. Ludhiana. The project was sanctioned by the Department Local Government (Local Government-1 branch), Chandigarh and study was conducted as per the guidelines of Government of Punjab.

4.1 Socio-economic Impact of Land Acquisition

The land owner Mr. Baldev Singh Grewal was contacted many times but he was not keen to give details.

4.2 Social Impact Management Plan (SIMP)

The Social Impact Management Plan (SIMP) is necessary to address the negative impacts of land acquisition. Social Impact Management Plan (SIMP) consist of institutional measures to be taken during the design, construction and operational phase of the project to eliminated verse social impacts, to offset them, to acceptable levelers. The main aim of the SIMP is to ensure that the various adverse impacts are mitigated and the positive impacts are enhanced.

Analysis of Social Impact of Acquisition of acquiring land in village Taraf Saidan, Ludhiana (East) for the construction of intermittent pumping station (disposal)

Type of Impacts	Mitigation measures
• Loss of land having area of 400 square yards (334.57 sq. mtrs), which is being held by Mr. Baldev Singh Grewal	• Compensation as per provision of RFCTLARR Act. 2013 • Rehabilitation Assistance

4.3 Costs and benefits from the project

The social costs by comparing project's positive and negative impacts of acquisition of land to construct intermittent pumping station (disposal) at village Taraf Saidan (now within Municipal Limits), Distt. Ludhiana have been discussed below:

Positive Impacts	Negative Impacts	Remarks
• Facility to the general public by disposing the waste water in scientific manner • Reduction in the toxicity level of water in Budha Naala • Improvement in the health status of the residents of Ludhiana city as well as whole state.	• Air pollution during construction • Loss of land which is being owned by Mr. Baldev Singh Grewal	• Keeping in view the whole analysis, land acquisition to construct intermittent pumping station (disposal) at village Taraf Saidan (now within Municipal Limits), Tehsil Ludhiana (East). Distt. Ludhiana would be beneficial to society at large. It is advised to allocate the fairest reward for impacted prty to reduce the impact caused by acquiring land.

4.4 Conclusion

The land owner Mr. Baldev Singh Grewal was contacted many times but he was not keen to give details. The proposed site for construction of intermittent pumping station (disposal) is abutting with Budha Naala and is lying barren for years. This site is not being utilized in any way. Therefore, keeping in view the whole analysis of land acquisition, the construction of intermittent pumping station (disposal) on this site will positively impact the health and quality of life of the residents of not only Ludhiana city but all over the state. The positive impacts of acquisition outweigh the negative ones and this acquisition will be a facility to general public. It is advised to allocate the fairest reward for impacted party to reduce impact caused by acquiring land.

NOTIFICATION FOR COMMENCEMENT OF SIA

Notification No. 06/02/2022-21gl/14225

Dated: Chandigarh: 06-10-2022

The State Government intends to acquire the land i.e. Khasra No. 1022 (400 Sq. Yards) which creates hindrance for construction of Intermittent pumping station (disposal) at Village Taraf Saidan (Now within Municipal Limits) Distt. Ludhiana, in consonance with the Resolution No. 168, dated 31.12.2019 of General House, Municipal Corporation Ludhiana. For the purpose Social Impact Assessment Study for public purpose has to be undertaken. The study shall be undertaken as per the provisions of Section 41 of "Right to Fair Compensation and Transparency in Land Acquisition, Rehabilitation and Resettlement Act, 2013".

Name of the Project Developer : Municipal Corporation, Ludhiana.

Purpose of Proposed acquisition of land : For construction of Intermittent pumping station (disposal) at Village Taraf Saidan (Now within Municipal Limits) Distt. Ludhiana. After the acquisition of this land i.e. Khasra No. 1022 of area 400 square yards, disposal of waste water could be done in a proper manner which will be a facility to the general public.

Organization to undertake the study : State Social Impact Assessment Authority,
Punjab Agriculture University, Ludhiana,
Punjab

Land Details:-

Sr. No.	District	Tehsil	Village/ Hadbast No.	Kheta/ Khntoni No.	Khasra No.	Name	Area to be acquired
1	Ludhiana	Ludhiana (East)	172	1273/ 1375	1022	For construction of Intermittent pumping station (disposal) at Village Taraf Saidan (Now within Municipal Limits) Distt. Ludhiana.	400 Sq.Yds (334.57 sq mtrs)

Brief description of the proposed Project:-

As per Resolution No. 320, dated 28.12.2021 of Hon'ble General House, Municipal Corporation, Ludhiana, the land is required to be acquired for construction of Intermittent pumping station (disposal) at Village Taraf Saidan (Now within Municipal Limits)

After Ludhiana. After the acquisition of this land i.e. Khata no. 1022 Khata/Khatons no. 12719/125 of area 400 Square Yards, disposal of waste water could be done in a scientific manner, which will be a facility to the general public. The ownership of this land will vest with Municipal Corporation, Ludhiana and the B&R Branch of Municipal Corporation, Ludhiana.

The Project area and the affected areas:-

Village Tarai Saldan (Now within Municipal Limits) Distt. Ludhiana. Khata no. 1022, 400 Sq Yds (334.57 sq mtrs)
